*Statement of Reasons for Allowance*

1. Claims 21-40 are allowed.
2. The following is an examiner's statement of reasons for allowance.

The present invention is directed to a system for generating a customized device user interface executable by an information handling system.

Independent claims 21, 26, 31 and 36 recite, or similarly recite, a method and method for generating a customized device user interface for an information handling system including modular user interface components whereby at least two of the modular user interface resource components are objects, the objects including common denominator functions for controlling a device and combining the objects to form a complete user interface for all functions of a device coupled to the information handling system.

The closest prior art, Duoma, Humpleman and Naughton, when combined, show a substantially similar system and method for generating a customized device user interface. However, the prior art, singularly or in combination, still fail to anticipate or render the above cited limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
